

KUMON^{MR}

Kumon. The world's largest after-school learning program.

The Kumon Method began with a parent's love. Determined to help his eight-year-old son, a math teacher named Toru Kumon developed the materials and guiding principles of the Kumon Method. Today, in 47 countries and regions on 5 continents, Kumon is helping millions of children succeed in the classroom and in life. It can help your child, too.

Helping children achieve more than they ever thought they could.

The Kumon Method empowers children to become **self-learners**. Each time our students tackle and overcome a new challenge, their confidence grows, and they realize they are achieving much more than they thought they could. Kumon puts them on the path to becoming the confident, independent, self-reliant people all parents hope their children can be.

What your child will learn at Kumon:

Math.
Confidence.

Any age. Any level.

The Kumon Method was created to help children of all ages and academic levels. With the Kumon Math Program, a child can start with simple counting and go all the way up through high school calculus. For catching up to grade level, discovering new levels of challenge, or reaching virtually any other academic goal, millions of students and their parents agree: Kumon works.

Learning how to learn.

Kumon is an academic program like no other. Instead of passively receiving instruction from teachers, Kumon Students actively develop **self-learning** skills. Here's how:

- Each student progresses at his or her own pace through an **individualized** program of worksheets carefully planned by the Instructor.
- Students do **daily** assignments that take about 30 minutes per subject—in two sessions a week at the Kumon Center, and the other five at home.
- Step by logical step, students steadily build a solid grasp of math, and become more confident and motivated with each worksheet solved.

The Kumon Worksheets.

The Kumon Worksheets are the key to the Kumon Method, and to your child's success. They cover everything from counting to calculus. Carefully designed and relentlessly fine-tuned, they've been effective for millions of students.

- The worksheets provide **examples** of how to solve each problem, enabling students to self-learn new concepts on their own.
- Each worksheet teaches a lesson that's one **small step** more advanced than the lesson before, so the student is less likely to hit a wall and become discouraged.

- An assignment is complete when a student has done every problem correctly. When that happens, the student "owns" that knowledge, and is ready for the next assignment.

The Kumon Instructor.

A friendly, qualified, **dedicated** partner for your child and for you, the Kumon Instructor is there to assess, guide and encourage your child every step of the way. The Instructor will also communicate with you on everything from lesson plans to progress reports, and will happily address any of your Kumon-related questions at any time. After all, the Instructor has the same goal you do—helping your child succeed.

The first step in your child's Kumon Journey:

The Parent Orientation.

As parents all over the world have discovered, Kumon helps children succeed—in the classroom and in life. Contact your local Kumon Center today to schedule an Information Meeting where the Instructor will give you a detailed explanation of the way we work and then, he/she will apply a **free placement test**. The result of this test and a lesson plan designed specially for your child will be shared in an individual meeting.
