Give your kids the academic advantage to compete in today’s world — FOR AGES 3+

THE EARLIER YOUR KIDS START, THE SMARTER THEY’LL BE!
The perfect time to start Kumon is before your child starts school. Starting Kumon early not only gets your child ready for school, it also lays the groundwork for advanced studies later on. The Kumon Program begins with simple counting in math, and letter sounds in reading, building a solid academic foundation that can mean early and ongoing success in the classroom. Just as importantly, it fosters confidence, self-esteem, and a love of learning that can last a lifetime.
The Kumon Method began with a parent’s love and a belief in the power of education.

Determined to advance the learning of his 8-year-old son, a math teacher named Toru Kumon developed the materials and guiding principles. The method was so successful that by sixth grade, his son Takeshi was solving calculus problems. Today, Kumon is advancing the learning of millions of students around the world.
The Kumon Reading Program starts with fun "look, listen, and repeat" worksheets that get your pre-reader to build vocabulary. Colorful illustrations connecting words to familiar objects start your child on skill-building activities and then help your child to start putting words together. These skills help your child begin reading simple sentences.

Success and confidence in math begin with learning and counting numbers up to 120, as well as proper number sequencing. These skills provide a strong foundation for learning basic addition and subtraction.

Pencil skills worksheets prepare students to write numbers and letters through drawing lines, curves and angles.

Here's how the Kumon Method Gives Your Child a Great Head Start.
THE KUMON INSTRUCTOR GUIDES AND ENCOURAGES YOUR CHILD BY:

Continually reviewing progress.

Fine-tuning lesson plans.

Offering guidance as needed.

Regular conferences with you also help gauge progress, goals, and motivation — accelerating learning even more. You, along with your child’s instructor, play an important role in ensuring your child gets the most out of the program.
After Porter’s parents enrolled his older sister in Kumon as a pre-schooler, they watched her reading advance to a second grade level — during kindergarten. Wanting their son to have the same advantages, they enrolled Porter before he knew his numbers, letters, or how to write properly with a pencil. In just two months, his parents already saw improvement. “He gets excited when he recognizes pictures he’s seen in his Kumon exercises,” says his mom, Rebecca. Porter’s individualized lesson plans allow him to progress at his own pace, and he’s thriving.
Our free Parent Orientation can help you learn more about how the Kumon Program can give your child an academic advantage in school and beyond. Simply contact your local Kumon Center to schedule your visit.
