

# KUMON MEXICO CONTINUES TO STRENGTHEN ITS COMMITMENT TO ENVIRONMENTAL CARE

Kumon Mexico is steadfast in its commitment to environmental care. We recognize the importance of protecting the environment, and we believe that every action, no matter how small, can have a significant impact. Just as a student's daily 20-minute effort to complete Kumon homework leads to exponential growth in their skill development, Kumon Mexico is taking small but meaningful steps towards long-term sustainability.

For instance, during the third Instructor seminar of the year, which also included a workshop, Kumon Mexico associates made a conscious decision to avoid printing a three-page document for all participants. This decision resulted in saving at least 1,488 sheets of paper and 496 folders.

To put this into perspective, producing that amount of paper would have required 148.8 liters (39.3 gallons) of water and 7.4 kg (10.3 lbs) of wood, which is equivalent to one young tree. Additionally, this effort reduced the emission of approximately 13.4 kg (29.5 lbs) of CO<sub>2</sub>, which is equivalent to the emissions produced by a typical car driving 90 kilometers.

Kumon Mexico's dedication to environmental sustainability is evident through its thoughtful initiatives. By making conscious decisions like reducing paper usage during seminars, Kumon Mexico not only conserves natural resources but also sets a positive example for others to follow. These efforts demonstrate that even small actions can collectively make a significant impact on the environment, aligning with Kumon Mexico's broader commitment to fostering a better future for both its students and the planet.
