

What could your kids gain (or lose) this summer?

Summer Learning

Guidance & Care by Parents

Parents play a key role in filling the gaps for the child over the summer.

Summer Loss

-2.6 Months in Math

Students will lose 2.6 months of math computational skills over the summer.

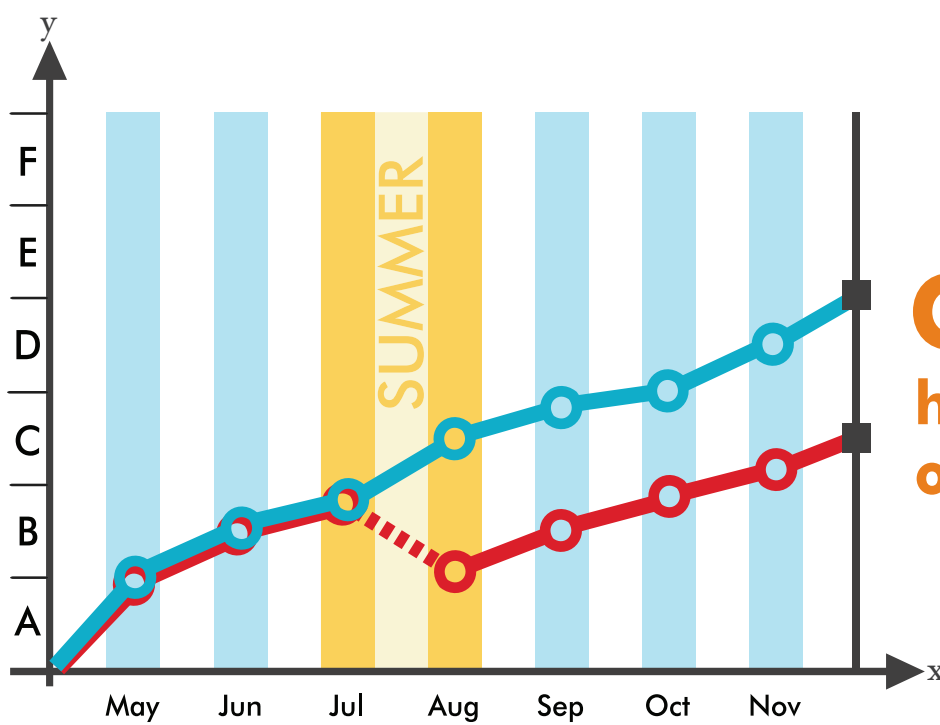

2 Months

of subject focused learning is all it takes to improve specific skills.

-2 Months in Reading

Students may lose 2 months of reading skills over the summer.

Consistency has a huge impact on student progress

- Progress of a student that **continued** learning during summer months.
- Progress of a student that **discontinued** learning during summer months.

-18 Months

By 6th grade, students can lose more than 18 months of learning due to summer learning loss.

Doing a little bit every day - even in the summer - is one of the cornerstones of the Kumon Method, and leads to long-term success!
