Small Steps. Big Advancement.

Kumon is a supplemental learning program that helps children from preschool through high school develop strong math, reading and writing skills. The proven Kumon Method uses a step-by-step approach to learning that ensures children advance by ability, not grade. Each worksheet set is one small step more advanced than the previous set.

Learn more about how Kumon's time-tested curriculum works alongside your preschooler's learning.

LEARNING TO COUNT

Preschoolers become familiar with numbers by learning to count objects.

READING NUMBERS

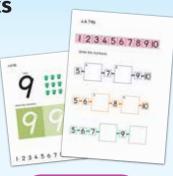

Preschoolers begin to recognize and read numbers.

UNDERSTANDING THE NUMBER SEQUENCE

Students are introduced to the number sequence and begin to understand the order of numbers.

Preschool Math

LEARNING TO WRITE NUMBERS

Students learn to write numbers while strengthening their understanding of the number sequence.

LEARNING ADDITION

Students begin to learn the basics of addition.

AND BEYOND...

Students advance to more complicated addition and then are introduced to subtraction, multiplication, and division.
